DECAPEPTYL® S.R. 11.25 mg

powder and solvent suspension for injection (I.M. or S.C.), 3-month prolonged release form
Triptorelin

Read all of this leaflet carefully before you start using this medicine because it contains important information for you.

- Keep this leaflet. You may need to read it again.
- If you have any further questions, ask your doctor or pharmacist.
- This medicine has been prescribed for you. Do not pass it on to others. It may harm them, even if their symptoms are the same as yours.
- If you get any side effects, talk to your doctor or pharmacist. This includes any possible side effects not listed in this leaflet. See section 4.

What is in this leaflet?

1. What is DECAPEPTYL® S.R. 11.25 mg, powder and solvent suspension for injection (I.M. or S.C.), 3-month prolonged release form and what is it used for?
2. What you need to know before you use DECAPEPTYL® S.R. 11.25 mg, powder and solvent suspension for injection (I.M. or S.C.), 3-month prolonged release form?
3. How to use DECAPEPTYL® S.R. 11.25 mg, powder and solvent suspension for injection (I.M. or S.C.), 3-month prolonged release form?
4. What are the possible side effects?
5. How to store DECAPEPTYL® S.R. 11.25 mg, powder and solvent suspension for injection (I.M. or S.C.), 3-month prolonged release form?
6. Contents of the pack and other information.

1. WHAT IS DECAPEPTYL® S.R. 11.25 MG, powder and solvent suspension for injection (i.m. or s.c.), 3-month prolonged release form AND WHAT IS IT USED FOR?

This medicine is an analogue of a natural hormone.

Gonadotrophin-releasing hormone analogue - ATC code: L02AE04

It is used:

- In men: for certain prostate and bone diseases.
- In women: for the treatment of endometriosis.
- In children: for treatment of central precocious puberty (puberty that occurs at a very young age).

2. WHAT YOU NEED TO KNOW BEFORE YOU USE DECAPEPTYL® S.R. 11.25 MG, powder and solvent suspension for injection (i.m. or s.c.), 3-month prolonged release form?

Do not use DECAPEPTYL® S.R. 11.25 mg, powder and solvent suspension for injection (i.m. or s.c.), 3-month prolonged release form

• If you are allergic (hypersensitive) to triptorelin, gonadotropin releasing hormone (GnRH), other GnRH analogues or any of the excipients of DECAPEPTYL® (see section 6).

• If you are pregnant or breast-feeding.

Warnings and precautions

Talk to your doctor or pharmacist before taking DECAPEPTYL® S.R. 11.25 mg, powder and solvent suspension for injection (i.m. or s.c.), 3-month prolonged release form:

- Patients receiving this treatment should be kept under close medical supervision with sometimes regular, biological, clinical and radiological controls.
- If you are using medicines for preventing your blood clotting, since you may experience bruising at the site of intramuscular injection. For men only, the product could be administered with intramuscular or subcutaneous route.
- There have been reports of depression in patients taking DECAPEPTYL® which may be severe. If you are taking DECAPEPTYL® and develop depressed mood, inform your doctor. DECAPEPTYL® PR 11.25 mg can induce mood changes.
- Treatment with DECAPEPTYL® PR 11.25 mg or other GnRH analogues may increase the risk of developing thin or weak bones, especially if you are a heavy drinker, a smoker, have a family history of osteoporosis (a condition that affects the strength of your bones), have a poor diet or take anticonvulsants (medicines for epilepsy or fits) or corticosteroids (steroids). If you have anything wrong with you that affects your bones, such as osteoporosis, tell your doctor. This may affect the way your doctor decides to treat you.
- If you have any heart or blood vessel conditions, including heart rhythm problems (arrhythmia), or are being treated with medicines for these conditions. The risk of heart rhythm problems may be increased when using DECAPEPTYL®.
- If you have diabetes or if you suffer from heart problems, inform your doctor.
- If you have an enlargement (benign tumour) of the pituitary gland that you were unaware of, this may be discovered during treatment with DECAPEPTYL® PR 11.25 mg. Symptoms include sudden headache, vomiting, problems with eye sight and paralysis of the eyes.

In men

- At the beginning of treatment there will be an increased amount of testosterone in your body. This may cause the symptoms of the cancer to get worse. Contact your doctor if this happens. The doctor may give you some medicine (an anti-androgen) to prevent your symptoms from getting worse.
- During the first weeks of treatment, DECAPEPTYL® PR 11.25 mg may, as with other GnRH analogues, in isolated cases, cause the spinal cord to compress or the urethra (where you pass urine) to block. You will be monitored by your doctor and given treatment for these conditions if they occur.
- After surgical castration triptorelin does not induce any further decrease in serum testosterone levels.
- Diagnostic tests of pituitary gonadal function conducted during treatment or after discontinuation of therapy with DECAPEPTYL® S.R. 11.25 mg may be misleading.
- The testosterone deprivation can induce anemia (decrease of the number of red blood cells).

In women

- You may have some vaginal bleeding in the first month of treatment. After that your periods normally stop.
- Tell your doctor if you have bleeding after the first month of treatment.
- Your periods should start about 5 to 6 months after the last injection.
- You must use some form of contraception other than the 'pill' during all the treatment and till the menses are back.

In children

- Girls who have an early puberty may have some vaginal bleeding in the first month of treatment.
- If you have a progressive brain tumour, please inform your doctor.
- When treatment is stopped signs of puberty will occur.
- In girls, periods will start on average one year after stopping treatment.
- Early puberty caused by other diseases should be ruled out by your doctor.
- The amount of minerals in the bones decreases during treatment but his returns to normal after treatment is stopped.
- Tell your doctor if you experience sudden onset of hip pain after stopping treatment

Other medicines and DECAPEPTYL® S.R. 11.25 mg, powder and solvent suspension for injection (i.m. or s.c.), 3-month prolonged release form

Please tell your doctor or pharmacist if you are taking or have recently taken any other medicines.

In men:

DECAPEPTYL® might interfere with some medicines used to treat heart rhythm problems (e.g. quinidine, procainamide, amiodarone and sotalol) or might increase the risk of heart rhythm problems when used with some other drugs e.g. methadone (used for pain relief and part of drug addiction detoxification), moxifloxacin (an antibiotic), antipsychotics (used for serious mental illnesses).

DECAPEPTYL® S.R. 11.25 mg, powder and solvent suspension for injection (i.m. or s.c.), 3-month prolonged release form with food and beverage

Not applicable.

Pregnancy and breast-feeding

This medicine should not be used during pregnancy or breast-feeding. Do not use DECAPEPTYL® PR 11.25 mg if you are trying to get pregnant.

Driving and using machines

You may feel dizzy, tired or have problems with your sight such as blurred vision. This disease, if you experience any of these side effects, you should not drive or use machines. **DECA injection (i.m. or s.c.), 3-month prolonged release form contains sodium.** It is to say without sodium.

3. HOW TO USE DECAPEPTYL® S.R. 11.25 mg, powder and solvent suspension for

Posology

One injection every 3 months.

If you have the impression that the effect of DECAPEPTYL® S.R. 11.25 mg is too strong or

Method of administration

For men only: intramuscular or subcutaneous route

For women and children: intramuscular route only. The powder should be reconstituted with the solution provided immediately before injection. The suspension obtained should not be mixed with other medicinal products.

ease form ?

D

2d / ٢

- When the suspension is homogeneous, pull down the needle and without inverting the vial, draw up all of the suspension. A small amount will remain in the vial and should be discarded. An overfill is included to allow for this loss.
- Grasp the coloured hub to connect needle. Remove the needle 1 used for the reconstitution from the syringe. Screw onto the syringe corresponding to the type of injection :
 - o For **intramuscular** injection, needle 2 (long needle with safety device) or
 - o For **subcutaneous** injection in **men only**, needle 3 (short needle with safety device).
- Move the safety sheath away from the needle and towards the syringe barrel. The safety sheath remains in the position you set.
- Remove the needle protection from the needle.
- Prime the needle to remove air from the syringe and inject immediately.

- Quand la suspension est homogène, descendre l'aiguille et, **sans retourner le flacon**, aspirer toute la suspension dans la seringue. Une petite quantité de suspension restera dans le flacon et devra être éliminée. Un excès de poudre et de solvant est prévu lors de la fabrication pour autoriser cette perte lors de la préparation de la seringue.
- Enlever l'aiguille 1 utilisée pour la reconstitution en la saisissant par l'embout coloré. Visser sur la seringue l'aiguille correspondant au type d'injection :
 - o Pour une **injection intramusculaire**, l'aiguille 2 (aiguille longue avec un système de sécurité) ou
 - o Pour une injection **sous-cutanée**, chez l'**homme uniquement**, l'aiguille 3 (aiguille courte avec un système de sécurité)
- Faire basculer le manchon de protection de l'aiguille vers le corps de la seringue. Le manchon de protection reste dans la position que vous définissez.
- Enlever le capuchon de l'aiguille.
- Amorcer l'aiguille en vidant l'air contenu dans la seringue et injecter immédiatement.

- عندما يصبح المعلق متجانساً، قم بإزال الإبرة واسحب المعلق بالكامل دون قلب القارورة. ستبقى كمية صغيرة في القارورة ويجب التخلص منها. لقد تم إضافة كمية إضافية للسماح بهذه الخسارة.
- إقبض على الجزء الملون لفصل الإبرة. قم بإزالة الإبرة ١ المستخدمة في إعادة التركيب من المحقنة، ثم قم بتثبيت الإبرة في المحقنة:
 - o للحقن العضلي، إبرة ٢ (إبرة طويلة مع جزء أمان) أو
 - o للحقن تحت الجلد للرجال فقط، إبرة ٣ (إبرة قصيرة مع جزء أمان).
- أبعد غمد الأمان عن الإبرة ونحو أسطوانة المحقنة. غمد الأمان يبقى في الموضع الذي قمت بتعيينه.
- قم بإزالة حماية الإبرة عن الإبرة.
- اضغط مبدئياً على الإبرة لإزالة الهواء من المحقنة واحقنها على الفور.

3 - INJECTION / 3 - INJECTION / الحقن العضلي / ٣

• WOMEN, CHILDREN

- o with **needle 2 (long needle)** intramuscular injection into the gluteal muscle.

• MEN

- o with **needle 2 (long needle)** intramuscular injection into the gluteal muscle or.
 - o with **needle 3 (short needle)** subcutaneous injection into abdomen wall or lateral aspects of thigh.
- Grasp the skin of abdomen or thigh, elevate the subcutaneous tissue and insert the needle with an angle between 30 and 45 degrees

• FEMMES, ENFANTS

- o injection **intramusculaire** dans le muscle glutéal (muscle fessier) avec l'**aiguille 2** (aiguille longue)

• HOMMES

- o injection **intramusculaire** dans le muscle glutéal (muscle fessier) avec l'**aiguille 2** (aiguille longue)
- o injection **sous-cutanée** dans la paroi abdominale ou la face latérale des cuisses avec l'**aiguille 3** (aiguille courte). Saisir la peau de l'abdomen ou de la cuisse pour dégager le tissu sous-cutané et insérer l'aiguille avec un angle compris entre 30 et 45 degrés.

• النساء والأطفال:

- o بالإبرة ٢ (إبرة طويلة) للحقن العضلي في العضلة الألية.

- o بالإبرة ٢ (إبرة طويلة) للحقن العضلي في العضلة الألية أو،
- o بالإبرة ٣ (إبرة قصيرة) للحقن تحت الجلد في جدار البطن أو الجوانب الجانبية للفخذ. أمسك جلد البطن أو الفخذ، ارفع الأسطح تحت الجلد وأدخل الإبرة بزاوية تتراوح بين ٣٠ و ٤٥ درجة

4 - AFTER USE / 4 - APRES UTILISATION / بعد الاستخدام / ٤

- Activation of the safety system using a one-handed technique,

- o Note : Keep your finger behind the tab at all times

- Method A : push the tab forward with your finger or

- Method B : push the seath to a flat surface

- o In both cases press down with a firm quick motion until a distinct audible click is heard.

- o Visually confirm that the needle is fully engaged under the lock.

- Dispose the needles in designated sharp container.

- Activer le système de sécurité en utilisant la technique à une main

- o Remarque : garder constamment votre doigt derrière le butoir

- Méthode A : pousser le butoir avec votre doigt ou

- Méthode B : pousser la gaine de protection sur une surface plane.

- o Dans les deux cas, appuyer avec un mouvement ferme rapide jusqu'à l'audition d'un clic.

- o Vérifier visuellement que l'aiguille est complètement prise dans le manchon de protection.

- Jeter les aiguilles dans des containers adaptés.

Lock / Verrou

- قم بتفعيل نظام السلامة باستخدام تقنية اليد الواحدة.
- o ملاحظة: احتفظ بإصبعك خلف الشريط دائماً.
- هناك طريقتان لتفعيل نظام السلامة:
- الطريقة أ: اجذب الشريط للأمام بإصبعك أو
- الطريقة ب: ادفع الشريط على سطح مستو
- o في كلتا الحالتين، اضغط للأسفل بحركة سريعة ثابتة حتى يتم سماع صوت نكّة.
- o تأكد بصرياً من أن الإبرة قد تم تركيبها تحت القفل تماماً.
- تخلص من الإبرة في حاوية خاصة.
